STUDENT INFORMATION SYSTEM

Aim

To develop a Student Information System in Zoho Creator that stores personal details and academic records and allows the submitted information to be viewed in a report.

Procedure

1. Open Zoho Creator and create a new application named **Student Information System**.

2. Create a form called **Student Information** for collecting student and academic details.

3. Add the fields Student Name, Register Number, Address, Phone Number, Age, Course, Grade, Attendance Percentage, Progress Report, and Semester Mark (out of 100).

4. Select appropriate field types for each item, including name, text, address, phone, number, dropdown, and multi-line fields.

5. Set suitable choices for the Course and Grade dropdown fields.

6. Configure the numeric fields to store age, attendance percentage, and semester marks.

7. Save the form and open the live application.

8. Enter the sample student details shown below and submit the form.

9. Open **All Student Information** to locate the newly saved record.

10. Check the record details to confirm that the entered personal and academic information has been stored correctly.

Sample Input

Field	Value
Student Name	MICHAEL
Register Number	12365478
Address	12 Main Road, Anna Nagar, Chennai, Tamil Nadu 600040, India
Phone Number	+91 9000000001
Age	18
Course	Cloud Computing
Grade	A Grade
Attendance Percentage	90
Progress Report	Very good
Semester Mark (out of 100)	95
