EXPERIMENT 11

SUPER MARKET MANAGEMENT SYSTEM

Aim

To develop a Super Market application in Zoho Creator that stores customer information and purchase details, including item category, quantity, unit price, and total amount.

Software Requirements

1. Web browser (Brave or Google Chrome)
2. Zoho Creator
3. Internet connection

Procedure

1. Open Zoho Creator and create a new application named Super market.
2. Create a form titled Super market to record customer and purchase information.
3. Add fields for Customer Name, Address, Email, Item Name, Item Category, Quantity, and Price per Item.
4. Select suitable field types, including text, address, email, dropdown, and number or currency fields.
5. Set the Item Category dropdown with suitable options, including Grocery.
6. Configure Total Amount to calculate Quantity multiplied by Price per Item.
7. Save the form and open the live application to test the fields and calculation.
8. Enter the sample customer and item details, then submit the form.
9. Open Super market Report and verify that the saved record and total amount are displayed.

Sample Input

- **Customer Name:** MICHAEL
- **Address:** 12 Main Road, Anna Nagar, Chennai, TAMILNADU, 600082, India
- **Email:** pikachuxpokemon@gmail.com
- **Item Name:** Rice
- **Item Category:** Grocery
- **Quantity:** 5
- **Price per Item:** INR 50.00

Implementation Screenshots

Input Form

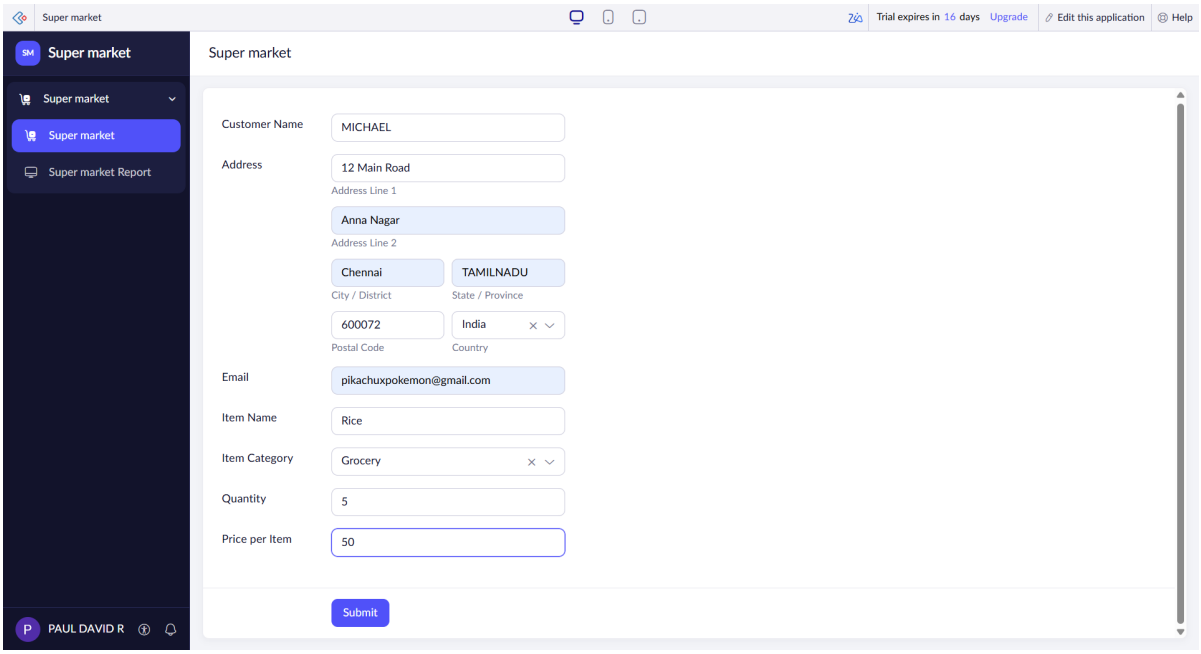

Figure 1: Completed Super market purchase form.

Output Screenshot

The submitted purchase record is displayed in the Super market Report. It includes the customer details, item name and category, quantity, price per item, and total amount.

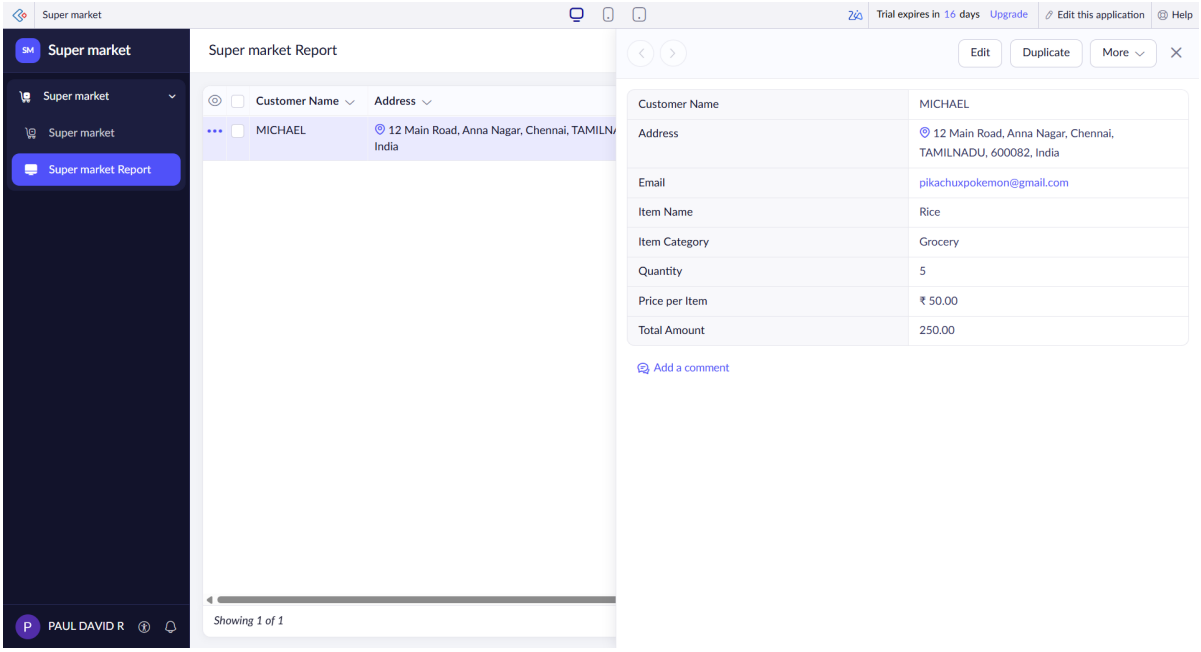

Figure 2: Saved purchase record displayed in the report view.

Calculation

Total Amount = Quantity x Price per Item

Total Amount = 5 x INR 50.00

Total Amount = INR 250.00

Result

The Super Market application was created successfully in Zoho Creator. The customer and purchase details were submitted and verified in the report view, with a total amount of INR 250.00.
