EXPERIMENT 7 – STUDENT ATTENDANCE SYSTEM

Aim

To develop a cloud-based Student Attendance System using Zoho Creator and demonstrate the Software as a Service (SaaS) model.

Requirements

- Zoho Creator
- Web browser
- Internet connection

Procedure

1. Open Zoho Creator and create a new application named Student Attendance System.
2. Create a form titled Student Attendance to record student and attendance information.
3. Add the fields Student Name, Register Number, Department, Total Working Days, Present, and Absent.
4. Configure Student Name and Register Number as text fields, Department as a text or selection field, and attendance counts as Number fields.
5. Save the form and open the live application to enter a sample attendance record.
6. Enter the student's name, register number, department, total working days, present days, and absent days.
7. Submit the form to save the attendance record.
8. Open All Student Attendances and check that the saved record displays the entered information.

Sample Input

- Student Name: MICHAEL
- Register Number: 26CSE015
- Department: CSE
- Total Working Days: 100
- Present: 85
- Absent: 15

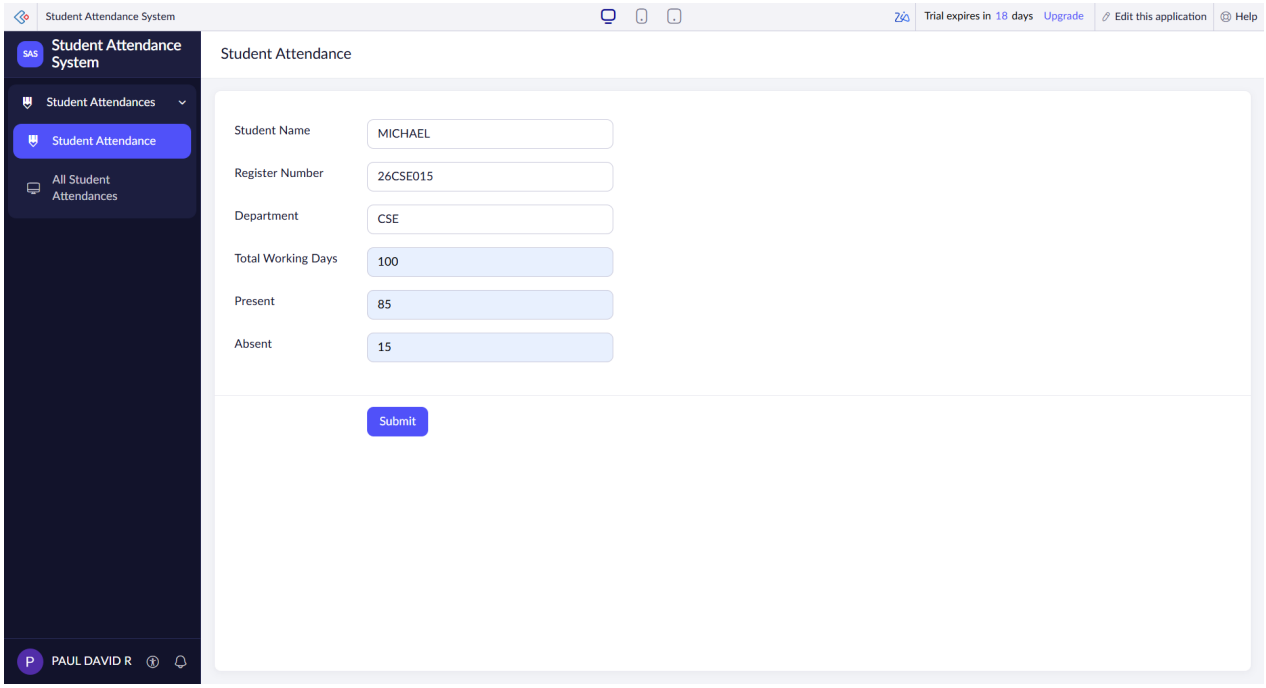

Calculation

Attendance Percentage = Present ÷ Total Working Days

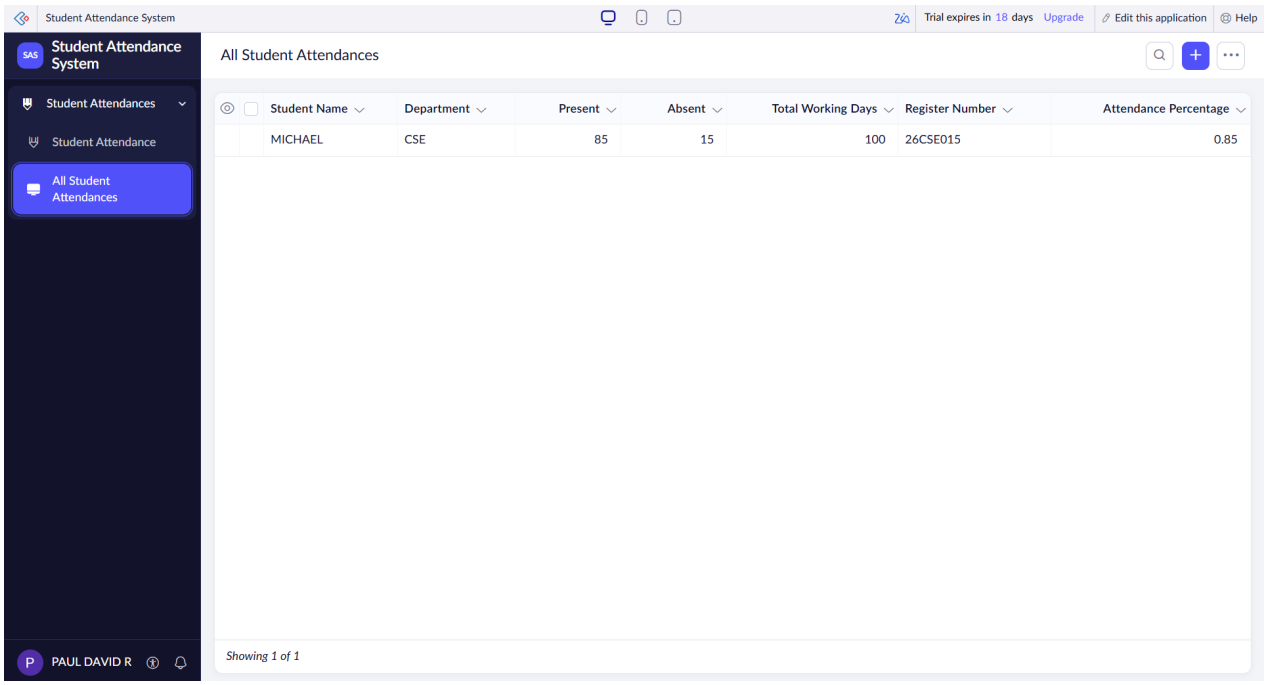

Attendance Percentage = 85 ÷ 100 = 0.85

Implementation Screenshots

Input Form

Output – All Student Attendances

Result

Thus, the Student Attendance System was created successfully using Zoho Creator. A sample student attendance record was submitted and verified in the saved records.
