# EXPERIMENT 1 – FLIGHT RESERVATION SYSTEM

## Aim

To develop a basic cloud-based Flight Reservation System using Zoho Creator, thereby demonstrating the Software as a Service (SaaS) model.

## Requirements

• Zoho Creator

• Web browser

• Internet connection

## Procedure

1. Launch Zoho Creator and start a new application for the reservation system.

2. Create a form named Flight Booking to capture the required reservation information.

3. Insert the fields Trip Type, From, To, Departure, Travelers, Class, Fare Type, and Flight Type.

4. Configure Trip Type with the choices One Way and Round Trip.

5. Provide Economy and Business as the available Class options.

6. Configure Fare Type with Regular and Flexible choices.

7. Set Flight Type to allow Domestic and International selections.

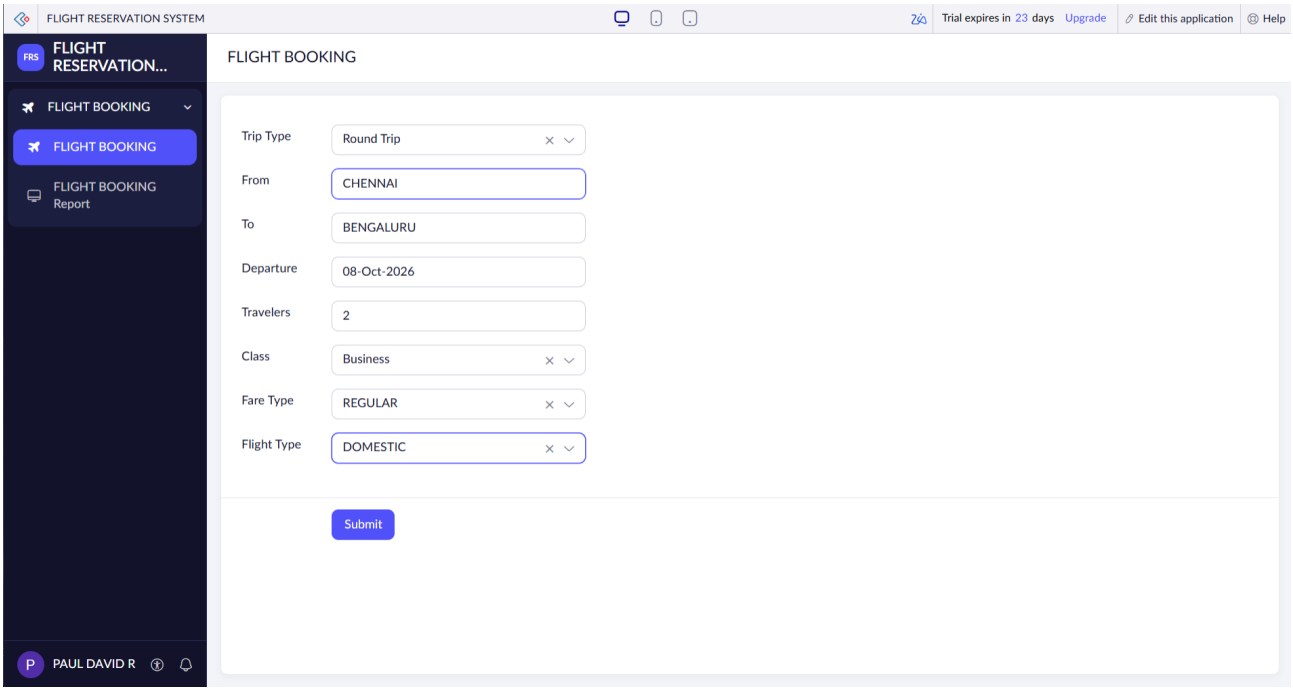

8. Save the form and open the application in its live view.

9. Fill in the form using sample flight reservation information.

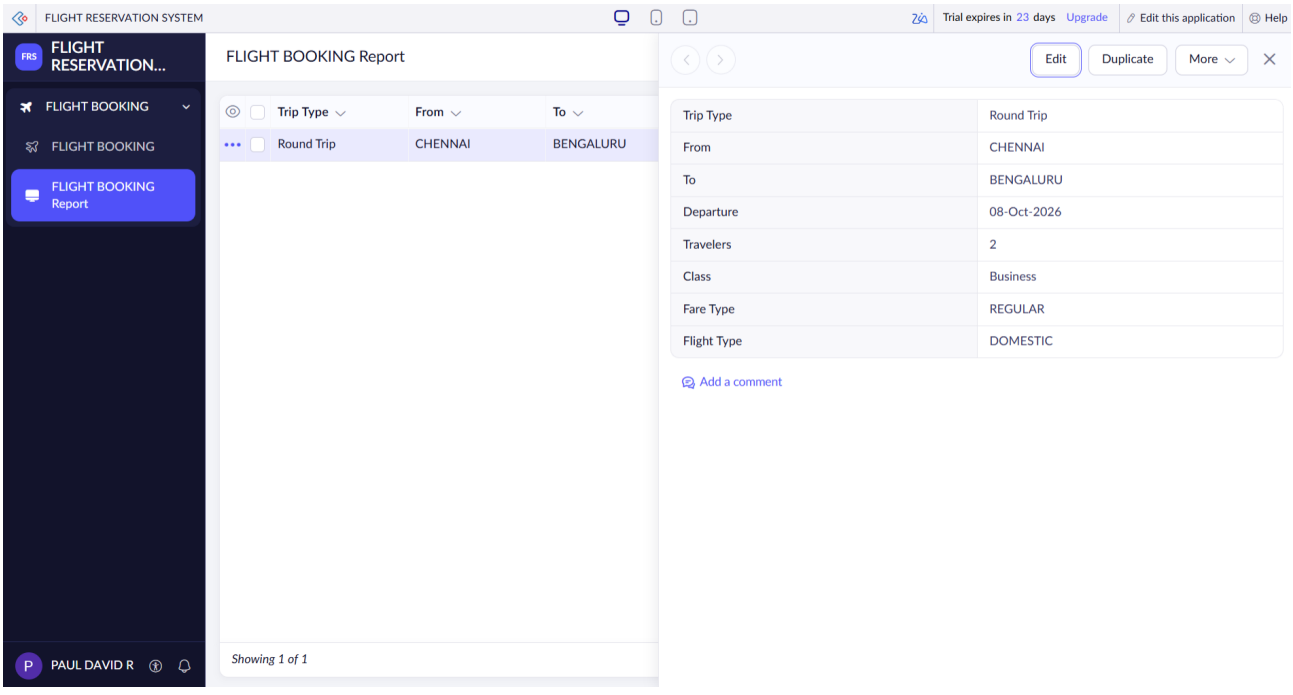

10. Submit the entry and confirm that the booking is displayed correctly in the report.

# Implementation

## Input:

## Output:

# Result

Thus, the cloud-based Flight Reservation System was successfully implemented using Zoho Creator. The application was tested by entering sample reservation details, and the submitted booking was successfully reflected in the Flight Booking Report.
