EXPERIMENT 5 - STUDENT MARK SHEET

Aim

To develop a cloud-based Student Mark Sheet application using Zoho Creator and demonstrate the storage and display of student marks through a Software as a Service (SaaS) model.

Requirements

• Zoho Creator

• Web browser

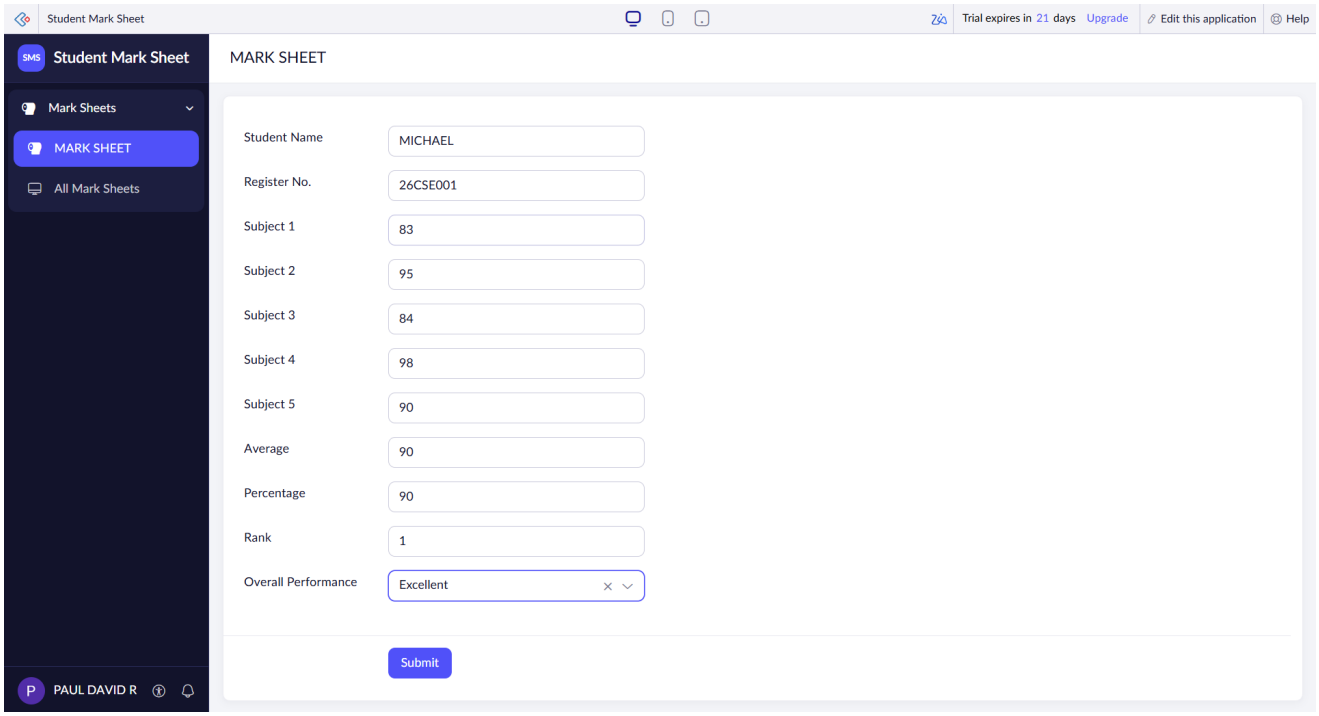

• Internet connection

Procedure

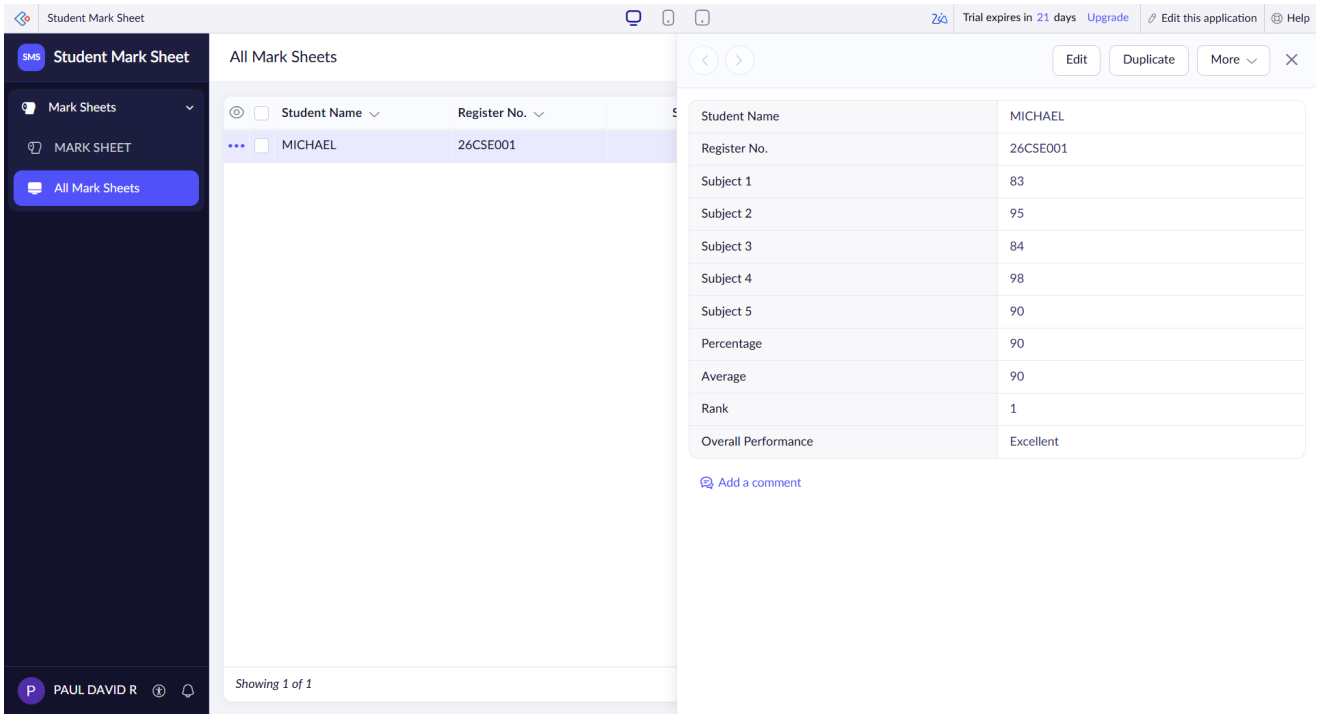

1. Open Zoho Creator and create a new application named Student Mark Sheet.
2. Create a form titled Mark Sheet to record student identity and academic results.
3. Add the fields Student Name, Register No., Subject 1, Subject 2, Subject 3, Subject 4 and Subject 5.
4. Add the Average, Percentage and Rank fields to store the student's performance details.
5. Create the Overall Performance field and configure the choices as Excellent, Good, Average and Poor.
6. Set the subject marks, average, percentage and rank fields to accept numeric values.
7. Save the form and open the live application to check that all fields are available.
8. Enter sample student details and marks, then select an appropriate Overall Performance category.
9. Submit the form to save the student mark sheet record.
10. Open All Mark Sheets and confirm that the submitted student's details and marks appear correctly.

Implementation

Input:

Output:

Result

Thus, the cloud-based Student Mark Sheet application was successfully created using Zoho Creator. Sample student marks were entered and submitted, and the saved record was verified in the All Mark Sheets report.
