EXPERIMENT 9

HOSPITAL INFORMATION SYSTEM

Aim

To create a hospital information application in Zoho Creator for entering and storing patient details, contact information, attendant details, doctor information, and diagnosis.

Software Requirements

1. Web browser (Brave or Google Chrome)
2. Zoho Creator
3. Internet connection

Procedure

1. Open Zoho Creator and create a new application named **SIMATS Hospital**.

2. Create a form titled **SIMATS Hospital Patient Details**.

3. Add fields for Patient Name, Age, Gender, Address, Phone Number, Email, Attender Name, Attender Phone Number, Doctor Name, and Disease / Diagnosis.

4. Choose suitable field types, such as Name, Number, Dropdown, Address, Phone, Email, and Single Line.

5. Configure the Gender dropdown with the options Male, Female, and Other.

6. Save the form and open the live application.

7. Enter the patient information in the form and submit it.

8. Open the patient details report and inspect the saved record to confirm that the submitted information is displayed.

Sample Input

- **Patient Name:** MICHAEL
- **Age:** 18
- **Gender:** MALE
- **Address:** 12 Main Road, Anna Nagar, Chennai, Tamil Nadu, 600040, India
- **Phone Number:** +91 9000000001
- **Email:** pikachuxpokemon@gmail.com
- **Attender Name:** ASH KETCHUM
- **Attender Phone Number:** +91 9000000002
- **Doctor Name:** DR PENGUIN
- **Disease / Diagnosis:** COLD

Implementation Screenshots

Input Form

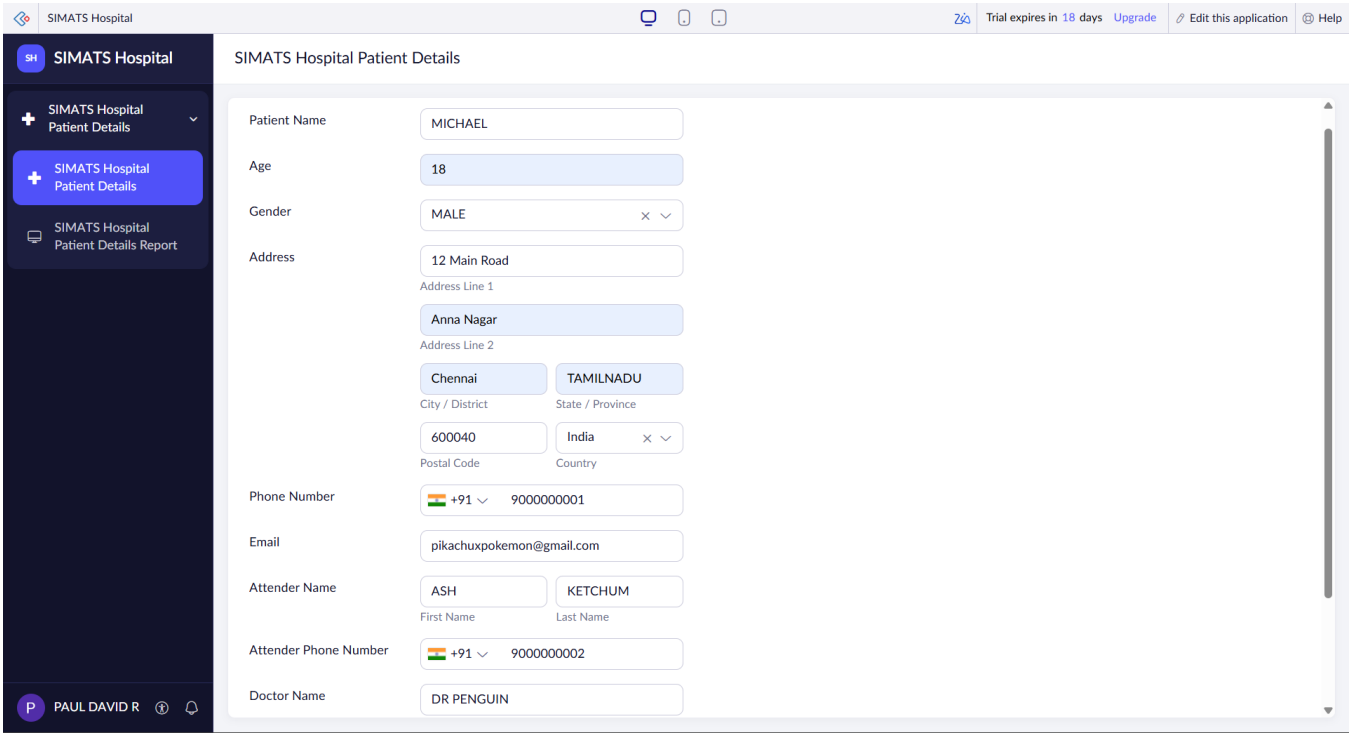

Figure 1: Completed SIMATS Hospital patient details form.

Output Screenshot

The submitted patient record is displayed in the SIMATS Hospital Patient Details Report. The saved record includes the patient's demographic details, address, contact details, attendant, doctor, and diagnosis.

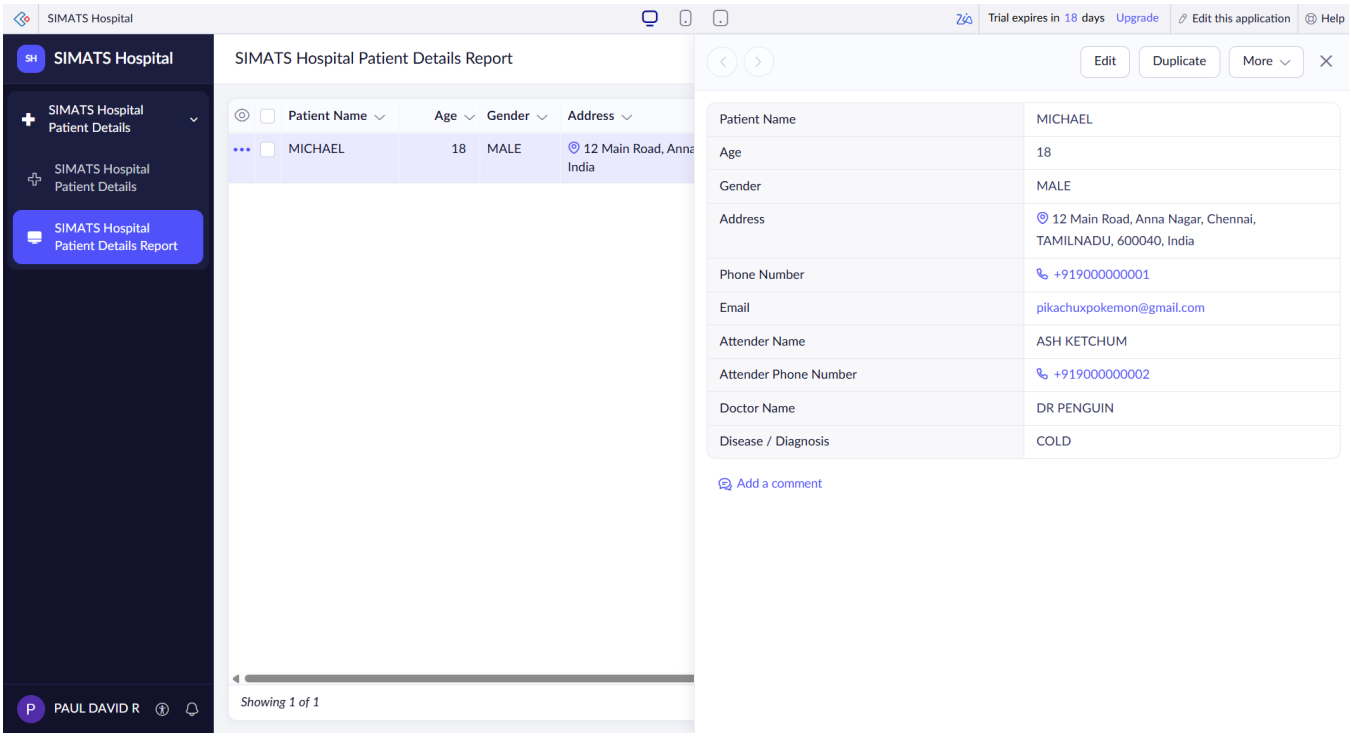

Figure 2: Saved patient record displayed in the report view.

Result

The SIMATS Hospital patient information application was created successfully in Zoho Creator. Patient details were entered, submitted, and verified in the report view.
